OX BOW RANCH PROGRAM

OX

The Ox Bow Ranch has been known for producing a female that has a type and kind-medium frame, easy fleshing, deep bodied, with a good udder. This is the type of cattle that has been here and the type we breed for today. For the past five years, we have set out to test the performance and longevity of our bulls a little more. Over the last few years, we have seen drought, brutal winters, and some encouraging weather. Considering those inconsistent conditions, limited watering holes and miles traveled up and down the mountains for feed- we are proud of their condition going into calving, they have held up. **This is the kind of testing we are talking about.** This is what truly maternal is. No irrigated pastures, no creep, and traveling miles for water and feed. These cow families truly hold up and perform in rough country.

The weather around the western states the last few years has been challenging to say the least. Conditions such as these are where OX Bow cattle thrive. We have, as many of you have, seen and heard reports of sub-par breed ups and lighter calves. The truly maternal, tough environment tested, easy fleshing cattle have stayed in production and continue to get the job done. Non-tested, low maternal and less thrifty cattle have left the herds. Our cattle are truly out from breeding to calving in good years and in bad. Because we have tested our cattle, our conception rates continue to stay unaffected.

OX BOW RANCH BULL DEVELOPMENT

The yearling bulls offered will consist of mainly calving ease bulls, with a handful of growth type bulls mixed in. These yearlings have been grown slow, with a mix between pasture and a high-end roughage ration. Our yearling bulls consume no more than 18lbs of dry roughage in the ration throughout the last three months before the sale. A great example of the low input type of easy gaining cattle we strive for. Most importantly, this ensures structural soundness, and bulls that will hold up as yearlings in tough country, without melting at turn out. The 2-year-old bulls are a moderate set of rugged, maternal bred bulls. They are developed being turned out all spring, summer, fall and are not raised in a feed pen. Again, we are shooting for soundness and structure, not record setting measurements.

We work hard to provide a well-balanced EPD profile for our customers, but we also know what our cattle can do. Our type, kind, performance model works in harsh conditions and performs year after year. These calves were trailed anywhere from 5 to 12 miles off the mountain before weaning, then ran across the scale. No filling them up on irrigated pasture. No creep feeders out. This, we think, gives a true comparison to our commercial producers. We all know what works on paper doesn't always work in the real world. For this reason, we are ok if we don't always match up with the latest and greatest EPDs. Our focus is producing bulls that work for our customers and make you money. Pounds at weaning matter and your calves are not purchased based upon what their sires EPD says. We believe in a balance of pounds weaned and mature cow height and weight that ultimately drives the largest profit factor for any cow-calf operation. If you see a bull that catches your eye, but might not meet an EPD requirement for you, let us know and we can help you determine if the actual results match what you are looking for.

“We have been using almost all
OX Bow bulls on our
Vera Earl Ranch to produce
maternally focused replacements
for our 3 breed rotation.
This ranch has historically weaned
540 pound calves on 1000 head.
This year we weaned 650 pound
calves across the board. Our cows
didn’t get any bigger just longer,
deeper, and stouter.”

*"I have been buying bulls from the Ox Bow Ranch for many years,
 they have been the best breeding bulls
 I have bought anywhere in Montana. You won't go wrong with an Ox Bow bull."*

~ Travis Edmundson, Dana Ranch, Cascade, MT

SALE NOTES

Hattie Jane

spent her newborn days and nights in the cab of a pickup during calving. Although night calving doesn't really fit into her busy sports schedule, her greatest escape has always been helping out riding, doctoring, feeding, whatever the list contained. Her appreciation for her ranch roots runs deep.

Hattie will be attending Carroll College and playing Volleyball in the fall, studying kinesiology/pre-PT.

We are super proud of you Hatts and will miss your company and help.

Special Thanks . . .

to all our buyers and bidders and a big thank you to all our past bull buyers. We really appreciate your business and friendship. May you have a healthy, happy and prosperous year!
